

Engage Your Audience by Reinforcing Your Message

Technology can create opportunities for people to engage in worship. Podcasting services, video-enabled lyric presentations, uplifting loops for certain songs, even expressions of worship via modern digital art can be ways to reach youths or more tech savvy individuals. Each of these tools can open more avenues for different kinds of people to connect with the service.

Widen Your Reach

Instead of reading the next letter or email from your missionaries, try setting up a webcam interview direct from them, projected live on your church video screen for Sunday morning. Seeing loved ones speak live allows for your church community to connect with their experiences while they happen.

Raise Awareness

By using solutions such as digital signage you can create awareness about events, guest speakers and fundraisers. These types of solutions enable you to create a large-scale campaign without the added cost of printing flyers or handouts. In addition, you can use large LCD's and LED signs as kiosks or for broadcasting prerecorded announcements. By implementing the right technology, you can do more with less.

Spinitar can provide your house of worship with state-of-the-art audiovisual systems that are both versatile and functional for building a community where all members can see, hear, and participate in the worship experience. Our certified audiovisual specialists are experts that can recommend, design, and install technology solutions that fit your precise needs. We can design and implement a carefully, crafted solution with key equipment that compliments existing or new facilities. Our solutions and services include:

Multi-screens and projectors

Display bright, colorful and sharp slides of scripture and images relating to the service; Song lyrics that “sing” the way they “read” on-screen; Live feeds of services, baptisms or weddings.

Video-conferencing

Link remote church locations or multi-sites; Make education available to a wider audience; Extend your ministry and teaching opportunities.

High-definition digital signage

Deliver targeted messaging such as upcoming event information to different areas of your church campus; Post helpful visitor information; Display pre-programmed material to multiple displays.

Bright large-scale LED signs

Advertise events; Drive donation campaigns; Set-up digital directories.

Robust sound systems

Use multiple inputs and outputs for reinforcing praise teams; Instruments; Video.

Voice and Data

We specialize in a variety of cabling solutions including CAT 5e, CAT 6, Outside Plant Fiber and High Pair Count Copper, Campus Cabling, VOIP and much more; Our team of experts includes a dedicated RCDD for designing your infrastructure network to the highest standards.

Service, support, and outsourcing

Provide day-to-day support of your audiovisual systems; Can create and schedule the delivery of your digital content; Supply you with resources familiar with the structural scope of your specific architecture.
