

Spinitar is now offering a variety of secure conferencing solutions that include premise distributions systems compliant with government regulations for transmitting classified information. Our complete secured offering with the combination of the Holocom PDS system will meet the needs and requirements of all branches of the U.S. Armed Forces. Engineered to meet the “spirit and intent” of NSTISSI No. 7003 requirements:

Holocom Secure Pathway is the most widely used secure engineered protective distribution system (PDS). This will enable

your clients to provide a wide array of integrated solutions over a SIPRNET network. The ONLY re-enterable secure system that allows the owner to open the system for inspection and EASY moves adds and changes. Following are just a few systems offered with secure PDS infrastructure systems:

- National Security Agency (NSA) – NSTISSI no.

7003, 13 December 1996

- U.S. Army Information Systems Engineering Command (ISEC) – SIPRNET Technical Guide, Version 6, October 2010
- Air Force Systems Security Instruction (AFSSI) 7703, August 2008, ESIM 2009-01
- U.S. Navy and U.S. Marine Corps IA, Publication

Immersive Solutions

Polycom® RPX™ Solutions

Fully immersive solution delivering a 100% controlled, life-like experience.

Immersive Solutions (continued)

Polycom® OTX™ Solutions

Immersive Telepresence solution combining high performance with unique design elements for small groups.

Polycom® ATX™ Solutions

Customized Immersive Telepresence designed for integrators to create unique telepresence solutions.

Room Solutions

Polycom® HDX® 6000, 7000, and 8000 Series

Advanced solutions bring HD video, voice, and content sharing capabilities to conference rooms, classrooms, and meeting spaces across the enterprise.

Polycom® EagleEye Director Solution

This camera tracking solution provides 'studio production' performance for enhanced interaction and productivity.

Desktop Solutions

Polycom® HDX® 4000, 4500 Solutions

Polycom personal telepresence solutions are designed to bring high definition audio, video, and content to smaller spaces such as the executive desktop or small meeting room.

Polycom® Converged Management Application™ (CMA®) Desktop Software

A video Conferencing application for knowledge workers, the CMA Desktop solution enables high-quality video and voice communication and standards-based content sharing. The CMA Desktop application is supported by Windows and Mac platforms. Supporting both H.323 and SIP call signaling, the CMA Desktop provides an excellent, cost effective solution for today's networks and tomorrow's protocols.

AMX Switching & Control

AMX technology offers government officials a one-touch solution to effectively manage audio/video sources and conferencing, data and multimedia communications, facility resources, as well as virtually any electronic or electrical system in place. From the courtroom to the front lines, AMX strengthens communications and assists those men and women in critical positions to make well-informed decisions.
