

Spinitar is a systems integration firm that has been in business for more than twenty-five years. We specialize in designing, installing and maintaining high-end audio, visual and communication systems for a wide variety of environments including conference rooms, classrooms, training facilities, auditoriums and more. Our team is comprised of certified and dedicated designers, engineers, project managers, field technicians and countless support personnel who work together on every high-quality, economic solution we provide.

Whether you are moving into a new facility or upgrading your existing one, Spinitar can transform the way you do business by providing the best and most appropriate communications and information technology solutions to meet your functional, budgetary and implementation requirements. Through detailed on-site needs analysis, Spinitar crafts a custom design-build solution that facilitates critical coordination issues such as lighting, electrical, construction and furniture integration. Once your system is installed, Spinitar provides you with value-added service and support featuring comprehensive user-training and a number of maintenance options.

Video Conferencing

Video conferencing capabilities allow you to collaborate and interact with colleagues instantly, while also saving time, money, travel costs, and the earth by minimizing your carbon footprint. Spinitar can help you easily connect to and from corporate boardrooms around the world.

Telepresence

Immersive telepresence systems redefine the meeting experience by allowing you to feel as if you are in the same room as colleagues in a remote location. Large displays depicting life size participants, consistent room design, and lighting all contribute to the in-person experience.

Control Systems

Manage AV system components such as video conferencing, presentations, and digital signage from a single source. Increase sustainability by monitoring on-site energy use. Reduce energy costs by adding room sensors and presets for shades, or control HVAC and irrigation

Audio Systems

A fully integrated audiovisual system is not complete without audio. Spinitar can help you grasp your audience's attention with crystal clear sound systems designed for meeting spaces, auditoriums, classrooms, command and control centers and more.

Voice and Data

Spinitar can provide you with complete design, implementation, and installation services for your voice and data project. We specialize in a variety of cabling solutions including CAT

5e, CAT 6, Outside Plant Fiber and High Pair Count Copper, Campus Cabling, VOIP and much more. Our team of experts includes a dedicated RCDD for designing your infrastructure network to the highest standards.

Digital Signage

Create, schedule, and deliver custom content to a targeted audience. Spinitar's team of certified specialists can design, install and help you manage your content so you can inform, educate and motivate your audiences without breaking the budget.

Rich Media Recording

Create and record live streaming and on-demand webcasts which can be watched by thousands of viewers. Plus managing that media is easier than ever. Search content in rich media presentations, measure viewer activity, test audiences online, or deliver video over third party networks.

Presentation Products

Need just the audiovisual equipment? Spinitar has you covered. We sell everything from rear projection displays and screens made for ambient lighting to document cameras and electronic whiteboards. Our audiovisual specialists can recommend the right gear for your needs.

Table Connectivity

Connectivity modules tie audio, video, control systems, and computer video sources to your audiovisual presentation system. Spinitar can design and install connectivity solutions for conference room tables, podiums, or anywhere computer audio, video, and communications connections are needed.
